

## APPENDIX A

School outcome data was collected and organized using data published at the Massachusetts Department of Elementary and Secondary Education's website (<http://profiles.doe.mass.edu/statereport/ssdr.aspx>). The following appendix reports the ranges across the various report measures. The table below reports the means, minimums, maximums for percent of students disciplined, in-school suspensions, and out of school suspensions per school. The final table reports similar data properties for the Tiered Fidelity Inventory (TFI) results across schools.
